**Medicaid and Behavioral Health Status of Youth Exiting Juvenile Rehabilitation Facilities**

**Calendar Year 2020**

**Q How many youth released from Juvenile Rehabilitation facilities had Medicaid coverage before or after exit?**

TOTAL RELEASED IN Calendar Year 2020 = 419

84% (352) had Medicaid coverage during the year prior to entering the facility

90% of individuals with Medicaid coverage in the year prior to entry were reconnected with medical coverage post-exit.

**Q What were the behavioral health treatment needs of released youth?**

EXITERS WITH PRIOR MEDICAID COVERAGE (352).

**Q How many youth with a MH or SUD treatment need received treatment services within three months of exit?**

OF EXITERS WITH MEDICAID COVERAGE POST-RELEASE WHO HAD THE IDENTIFIED BEHAVIORAL HEALTH TREATMENT NEED

**EXITER ENROLLMENT AND TREATMENT RATES BY RACE/ETHNICITY**

The graphs on the following page display the rates of Medicaid coverage, mental health treatment, and substance use disorder treatment—within three months after exit—broken out by race/ethnicity. Monthly treatment rates are volatile due to the small number of youth released from a JR facility in a given month. The charts on the following page use a rolling intake window that includes youth who exited in that month or the 11 months prior to smooth treatment rates over time. Individuals may be counted in multiple groups in the race/ethnicity details.

Presence of substance use (SUD) or mental health (MH) disorders were based on diagnoses, prescriptions, services, or arrest records in the 24 months prior to facility stay in youth who were Medicaid recipients 12 months prior to entry (N = 352). Treatment rates are based on those with a behavioral health (BH) disorder.

Youth Connecting to Medical and Behavioral Health Services after Exit from a Juvenile Rehabilitation Facility
Calendar Year 2020

Q Are there differences in Medicaid coverage by race/ethnicity?

- American Indian: 95%
- Asian American or Pacific Islander: 86%
- Black/African American: 83%
- Hispanic/Latino: 83%
- White, Non-Hispanic: 87%

Q Are there differences in mental health treatment rates by race/ethnicity?

- American Indian: 35%
- Asian American or Pacific Islander: 33%
- Black/African American: 34%
- Hispanic/Latino: 30%
- White, Non-Hispanic: 38%

Q Are there differences in substance use disorder treatment rates by race/ethnicity?

- American Indian: 15%
- Asian American or Pacific Islander: 11%
- Black/African American: 7%
- Hispanic/Latino: 12%
- White, Non-Hispanic: 11%

Presence of substance use (SUD) or mental health (MH) disorders were based on diagnoses, prescriptions, services, or arrest records in the 24 months prior to facility stay in youth who were Medicaid recipients 12 months prior to entry (N = 352). Treatment rates are based on those with a behavioral health (BH) disorder.
