**Values for Home Visiting Data Systems:**
- Promote Equity in data and system(s) to support all programs
- Data is a partnership between families, local implementing agencies and state agencies
- Produce the right data to:
  - o Tell the home visiting story, o Inform program practice and quality of services to best serve families, and
  - o Respond to funder and partner requirements and requests
- Support the local and state workforce to right-size data collection, reporting and production

# Data Enhancement Recommendations

| Align Data Requirements | Increase Capacity to Manage & Use Data | Develop Data Infrastructure Plan |
|---|---|---|
| a. Reduce duplicate and unnecessary reporting | a. Increase DOH capacity to customize data for LIAs | a. Define primary functions and system gaps |
| b. Align requirements and definitions with other funders | b. Increase LIA to use data | b. Document workforce impacts to collect & use data |
| c. Tailor requirements and measures to models | c. Expand opportunities for families to consume data | c. Document the true costs of data production |
| d. Support innovations in data collection | | d. Determine limits on number of supportable systems |
| e. Work with model systems to meet HVSA data needs | | e. Identify best data infrastructure investments |
| f. Identify opportunities to use Administrative Data | | |
