We use the Early Learning Guidelines and the Washington State Core Competencies for Early Care and Education Professionals standards because:

- They were created with significant community collaboration and input.
- Many early learning and school age programs in Washington have received a copy of both standards and may have already received training. So, they may be already familiar with the resources.
- The Guidelines include specific strategies and ideas to try with children. Providers might use them as they demonstrate their practice.
- The resources are flexible.

Flexible means that goals and action plans that were already underway will fit into the revised system.

The Coaching Companion is a powerful, web-based video feedback and annotation application for coaches and educators to collaborate. Educators upload video and documentation of their teaching practices with children in their learning environment and receive detailed feedback from a coach or peer. The Coaching Companion helps coaches and educators work together in a collaborative partnership to track progress through goal setting, focused observation, and reflection and feedback cycles. The Coaching Companion contains a robust media library featuring exemplar videos of effective teaching practices and research-based training materials—all within a password protected, secure platform. The coaching companion is also where you upload video highlights for Early Achievers and receive feedback. An app is under development that will set time boundaries on video clips and support an easy video upload process. The app will include strict security protocols to ensure videos are securely transferred and stored. The Coaching Companion is already in use by coaches and early learning and school age programs in Washington state and across the country. Check out the video about Coaching Companion back on the webpage.
Coaches will be working side by side with participants to help them navigate the updates to Early Achievers and create specific goals for their early learning program and staff. This means that coaches will be available to support use of the Coaching Companion and practice video uploads so that participants feel confident about submitting their work. We will continue to use the coaching model that early learning programs are already familiar with including using data to set collaborative goals based on participant needs and interests and work toward growth in a supportive coaching relationship.

Coacheska waxay la shaqeeynaayaan providers siday uu cawiyaan inaay laa soocdan waxyabaha laa badalay ama cusub.
Coach-ka waxuu diyaar u yahay in oo markaste kuga caawiyo sida aa video loo soo giliyo iyo sida aa adiga u dareentid kalsooni.

Waxaan si wadi doonaa isticmaalka barnaamilkaan sida shaqada coaches iyo providerska u fudadeyno.
